### **Quality Assured Safe Beef**

The Zimbabwe Association of Abattoirs assures all consumers of beef and beef products that beef sourced from its members is inspected by veterinarians and meat inspectors from the Department of Veterinary Services and certified as perfectly safe for human consumption.

Members of ZAA account for 60% of total beef processed, and supply quality assured beef to all major supermarket chains and butcheries with branches in cities and towns across Zimbabwe. Beef from these abattoirs is stamped with the classic official blue marking of the meat inspectors.

Government food safety inspectors have the right to confiscate and destroy any meat found in retail and wholesale outlets which has not been inspected and certified as safe by meat inspectors.

ZAA is proud to note that all its members comply strictly with cattle movement protocols and food safety standards. Proudly Zimbabwean beef is tasty, healthy and wholesome.

Members of the public are urged to report any suspicious activities to the Police.
